HOW TO ORDER

BEAM LENGTH: SHELF LENGTH EQUALS THE DISTANCE BETWEEN UPRIGHTS. IT IS DETERMINED BY ADDING THE WIDTHS OF PALLET LOADS PLUS A 5" SIDE CLEARANCE BETWEEN UPRIGHT AND PALLET AND 6" BETWEEN PALLET LOADS. SHELF BEAM CAPACITIES ARE BASED ON A PAIR OF BEAMS SUPPORTING AN EVENLY DISTRIBUTED LOAD.

RACK HEIGHT: ADD THE FOLLOWING FIGURES:

HEIGHT OF PALLET LOADS (INCLUDING PALLET)
+ HEIGHT OF SHELF BEAM
+ 4" MINIMUM VERTICAL CLEARANCE FOR EACH PALLET LOAD

SUM OF ABOVE DIMENSIONS = RACK HEIGHT

FOR UPPERMOST LOAD LEVEL, LOCATION OF SHELF BEAM SHOULD BE 6" LESS THAN FORK TRUCK'S MAXIMUM LIFT HEIGHT. TOP OF BEAMS NEED TO BE AT 2" INCREMENTS.

Drop Bottom Hopper

- **Open top, no lid design**
- **Single bottom door**
- **8" wide fork pockets**

A hopper with a bottom dump feature is a unique design not typical to classic hoppers. With a bottom dump hopper there is limited wasted space. Unlike standard hoppers that have angled sides to encourage the product to flow out, the bottom dump hopper utilizes all of the space in the hopper. There are built-in fork pockets to pick up hopper from the top, allowing the bottom to open and the hopper to be quickly emptied. An attached cable lets the user continue to be seated while opening the bottom hatch, minimizing down time and the need for additional personnel. Blue powder coat finish.

When snow needs moved and removed, look no further than the fork truck snow plow or snow pusher. The unique design attaches to fork truck forks, so no power supply is needed! Each plow and pusher is rotatable from both the left and the right sides, giving the user the choice of angles depending on the situation. "Pusher" models have enclosed sides to limit snow overflow and runoff, while the "Plows" have an open blade design. Each unit is built of steel and finished with a baked in powder coat.

LOAD MOVERS

Hydraulic Toe Jacks

HHTJ-508 HHTJ-1009

• The perfect choice for lifting loads to be moved on rollers.

Available in capacities of 5 or 10 tons. Provides the capability to jack-up loads that are just over 1" off the floor and also allow jacking from the top of the cylinder which extends the lifting range. Can be operated either vertically or horizontally and an internal pressure valve prevents jack overload. The clamping pads are comprised of SBR rubber to provide a durable yet secure non marking surface to grip the drum. The maximum lifting capacity of the EG2000RCR is 2000 lbs., however the actual capacity and lift height may be limited by the specifications of your lift truck. The Eagle-Grip Attachment includes two 12-volt AGM deep cycle batteries which are housed in a closable cabinet. The Quick-Claw option is also available, which eliminates the need for a safety chain. The fully welded, not riveted, construction holds the squareness of the unit for a longer life and offers greater protection in a fire since air gaps are reduced. For added security, each cabinet comes with an innovative U-Loc™ handle that does not require manual rotation to engage the mandatory latch. Cabinets include a cylinder lock and key set, or you can choose to use your own padlock. Trilingual Haz-Alert™ reflective warning labels that read "FLAMMABLE - KEEP FIRE AWAY"are highly visible under fire conditions or during power outages when illuminated with a flashlight.

- **FM approved cabinets are constructed of sturdy, double-walled 18 ga. steel with 1½" of insulating air space for fire resistance.**
- **Attractive flush-mounted handle -- ideal in tight spaces and less prone to damage in shipping. Reduces "accidental bangs" from passing traffic.**

Fingertip control with an exclusive slip resistant textured lining on the inside of handle. U-Loc™ handle style accepts optional padlock or can be key locked. Self-latching handle ensures engagement of 3-point latch for protection under fire conditions. Radiused corners on doors for added safety. Haz-Alert™ reflective labeling system provides high visibility under fire conditions or power outages. OSHA and NFPA compliant safety cabinets provide safe, secure storage and organization for flammable liquids. They minimize employee exposure, reduce fire risks and add to efficiency when positioned near points-of-use. FOB Shipping Point.

Aerosolv® Aerosol Can Disposal System

28225
Aerosolv® Counter makes it easy to count and record the number of aerosol cans punctured.

- **Provides a solution to the expense of solid waste disposal of aerosol cans.**
- **Complies with EPA regulations 40CFR261.23(a)(6).**

The Aerosolv® system safely converts spent aerosol cans from solid hazardous waste to a non-hazardous material. It accepts industry standard sized cans with a maximum height of 8½" (215-mm) and threads directly into a standard 2" (51-mm) bung on a 30 (110-liter) or 55-gallon (200-liter) drum. Body is made of low maintenance aluminum and all moving parts are 308 stainless steel. A non-sparking pin punctures the can and the residual liquids flow into the collection drum. One 55-gallon (200-liter) drum holds approximately 4,200 spent aerosol cans. Attach the two-part combination filter to the ¾" (19-mm) bung to filter VOCs from any residual propellants. The bottom coalescing cartridge transforms residual liquids into droplets that collect in the reservoir of the cartridge and safely drain into the drum. The top activated carbon filter cartridge indicates saturation and serves as a replacement reminder. Economical, non color-changing filter is also available. System includes a combination filter, safety goggles, and an anti-static ground wire with alligator clip. EPA compliant. FOB Shipping Point.

Sold as pairs, these drum locks fit most popular styles of steel and plastic 55 gallon drums. The steel set includes two units; one to fit over the 2"NPT plug, the other to fit over the ¾"NPT plug. Sign Muscle® preserves the life of your signs and labels! Our NEW & improved Sign Muscle® formulation is powerful enough to survive in most environments…and it's patented. Pioneered more than a decade ago, our scientifically strong liquid laminate protects your identification product from virtually any hazard. Durable, strong and resilient, Sign Muscle® delivers protection - guaranteed. A sign that lasts starts with a quality base material. For example, an industry tested material like plastic versus a typical competitor material with unknown orgins. The wrong base material can speed up damage to the potential life-saving safety message that sits on top. A message that guides a workforce to safety is a message that we can't allow to fade. Longevity through quality also means scientifically engineered ink-sets specifically created for the materials they will be printed on. That's the difference, driven by facts and supported by science. Resist fading and easily restore like new!

Counter Balanced Floor Cranes

- **Hand pump or 12V DC powered.**
- **Welded steel construction.**
- **Counterbalance included.**

This crane has an adjustable boom to allow for maximum adjustments and versatility to lift a variety of loads. The boom is raised with a manual hydraulic hand pump or a push of a bottom on DC powered units. The boom also telescopes out for a greater reach. The counterbalance design eliminates the need for front legs, making the unit easier to maneuver and ideal for reaching tight, hard to reach areas. LIFT MAGNET GUIDELINES:

Surface Condition: Magnet face and load surface must be clean and smooth. Capacity ratings listed are on flat, clean and polished steel plate with magnet face in full contact with the load surface. Paint, coatings, scale or other materials between the load surface and the magnet will adversely affect the holding power of the magnet.

Material Thickness: Lifting capacity is lower on thinner materials. Contact dealer for more capacity information.

Material Composition: Magnet capacity is based on lifting low carbon steel. Other materials may reduce lifting capacity.

Load Size and Position: Thin sheets, rough and irregular surfaces, odd shapes and scale all affect holding power adversely and must be considered in establishing a safety factor. The magnet must be positioned on the load center of gravity. Tilted or unbalanced loads significantly affect the holding power of the magnet.

Capacity: Maximum attractive force is approximately twice the rated lifting capacity. Capacity ratings listed are on flat, clean and polished steel plate with magnet face in full contact with the load surface. The above factors should be taken into account when determining appropriated safety factors for a given load. A minimum of 3 to 1 safety factor must be applied based on the actual breakaway force for a given load. **Refer to ASME Standard B30.20 for inspection and operating procedures of Close Proximity Operated Lifting Magnets and read Manufacturers' Operating Manual before using magnet.**

APL Series

- **Hands free activation.**
- **Great for use where operator access is limited.**

Lifting WEBBING SLINGS

- **Premium edge sling at a standard edge sling cost.**
- **These strong webbing slings ensure worry-free lifting of heavy loads. Polyester standard. Nylon available - call for pricing.**
- **Extremely strong and wear-resistant, yet soft enough to handle even delicate surfaces.**

PRO EDGE® Tougher. Stronger. Better.®

Pro-Edge® is 50% tougher than standard webbing. The edges are made with high tenacity twisted tire-cord yarns. It is a scientific fact that twisted yarns are more resistant to cutting and abrasion than untwisted yarns. Since these twists are part of the yarn construction, the cut and abrasion resistance properties of the yarn will not go away after standard wear. Pro-Edge® maintains its strength far longer than most other webbings. Polyester standard. Nylon available -- call for pricing. All slings are measured end to end including eyes and/or hardware. Rail Boards

Bluff Rail Boards are a way to bridge the gap between a dock and railcar for safe loading and unloading of shipments. They are custom designed to meet the unique specifications of each dock site, and can work successfully with any type of railcar. Lifting loops and locking rings make the Rail Board easy to place and secure before driving across it with a forklift. Available capacities range from 15,000-90,000 lbs. All-welded steel construction. Worksheet required to design - - call for pricing. FOB Shipping Point.

Edge of Dock Levelers

Bluff's Edge of Dock Leveler provides an easy way to correct the height difference between a dock and trailer bed. With a working range of 5" above and 5" below dock, it accommodates most loading applications. The leveler is positioned by lifting and pulling the handle to the dock floor, and then the latch assembly activates the lip, projecting it forward onto the bed of the trailer as the handle is lifted. When released, the handle automatically returns to its stored position. Conforms to ANSI MH30.1 Standards. FOB Shipping Point.

Edge of Dock Leveler Features

- **Capacities from 20,000 to 30,000 lbs.**
- **Available widths of 66", 72", and 78".**
- **Self-Storing handle.**
- **Bumper and bumper blocks included.**
- **Optional add-ons include: anchor kit, approach plate, longer lip for refrigerated trucks, steel faced bumpers and hydraulic package.**

Loading Dock Arms & Lights

The DL2 Series is a family of loading dock arms and lights reimagined and designed to be the future of dock lighting. The entire offering includes additional arm lengths to accommodate a broader range of applications, optimized arm and light head design, and the introduction of integrated LED technology into dock arms.

The **patented curved arm design** fits around door tracks without the need for additional joints or tubing, and the rectangular design significantly increases the strength and weight capacity compared to traditional dock arms. The DL2 Series arms also include a **bump-stop feature** that prevents the arms from obstructing doors. All dock arms and light heads are equipped with **a safety bumper** to protect operators from injury and mitigate damage to the product. The DL2 Series also utilizes **universal brackets**, making it very easy to install or retrofit existing dock lights without the need to drill new holes or install new mounting studs.

Safety Bumper

DL2 Integrated LED Loading Dock Arms

The DL2 Series features the introduction of integrated LED technology into dock arms. This patented technology eliminates the need for light heads, making the lights lighter, safer and easier to use, with less glare on operators while providing the same light levels as those with heads. The DL2 Integrated LED Loading Dock Arms use a patented curved arm design, rectangular tubing, and bump stop feature, making them a stronger, modernized, and streamlined alterative to traditional arm designs.

Structural Guard Rail (bolt-on and drop-in style)

Create a modular system to protect equipment, inventory, and individuals from damage or injury. Corrugated rails are constructed from ⅛" thick material, made for high impact resistance indoors or out. Posts are constructed of ¼" thick material with mounting holes on all four sides for use as corner or center posts. Posts measure 4" x 4" with a 10" square steel base plate that is ⅜" thick. Bolts and washers are provided with individual rail sections. Provide easy accessibility with our drop-in style rails. Slide rail sections into post saddles for simple assembly. Each drop-in style rail section includes two brackets. Bolt-on style rails are designed for permanent installation. Optional gate available for easy access in and out of work area. Industrial Fans

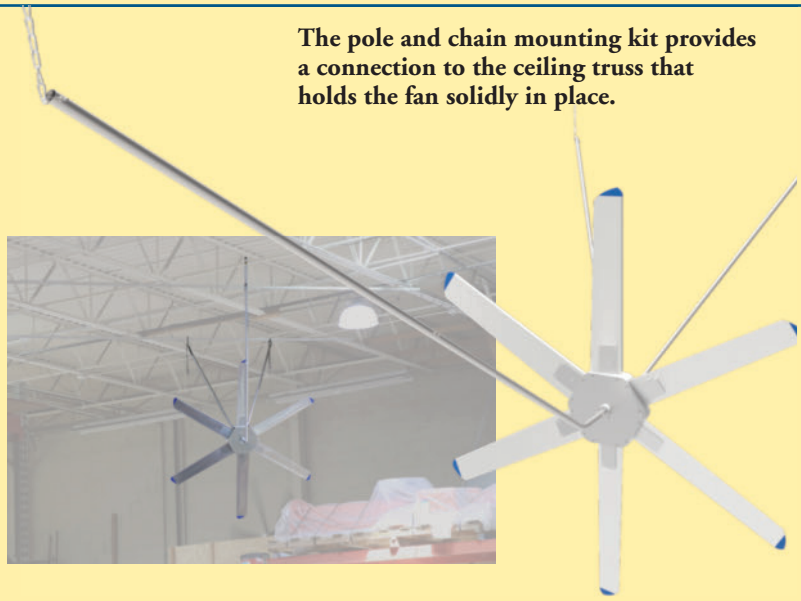
herkules Fans™

Not your typical ceiling fan!

These industrial 7' HVLS fans ceiling mount to blow air sideways and work together to provide superior circulation in larger facilities with ceiling heights of 18 or more feet. These lightweight, easy-to-install fans do a better job of reducing utility bills and providing comfort than larger downward facing fans. FOB Shipping Point.

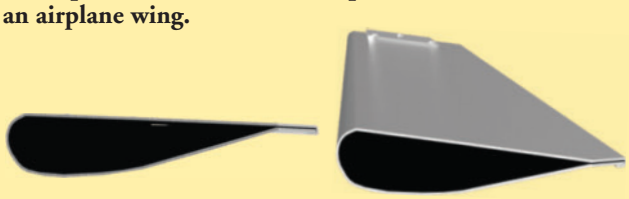
- Lightweight (45 lbs!) for easy installation
- Custom airfoil design for high airflow
- Low energy usage, reduced utility bills
- Low maintenance direct-drive motor
- Dependable 24/7 operation
- Minimum 9 foot clearance above floor



The pole and chain mounting kit provides a connection to the ceiling truss that holds the fan solidly in place.

Product No.	INDUSTRIAL CEILING FAN Description	Wt. (lbs.)	Price Ea.
HF0004	84" Unit. VFD speed control and mounting kit	60	$4,995.00

Blade profile to show airfoil shapes similiar to an airplane wing.



The Herkules fan utilizes a custom blade shape to achieve large air flow at very low power usage. Most fan blades on the market are extruded into simple shapes. Herkules' blades are made from aircraft grade aluminum and bent to achieve an optimized design.

Specification and General Information

Motor 90% Efficiency; Direct Drive; 0.7 hp	**Power Consumption** 10-350 Watts (Variable Speed)	**Input Power; Selectable** 110V, max. 14A; OR 208V - 220V, Single Phase, max. 10A

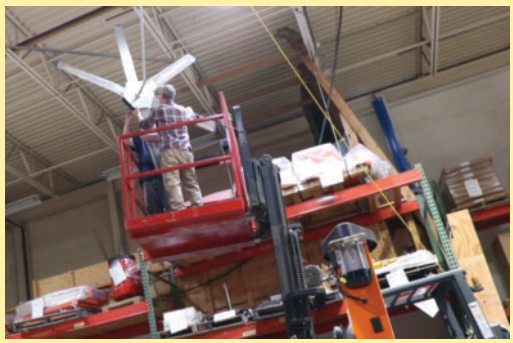
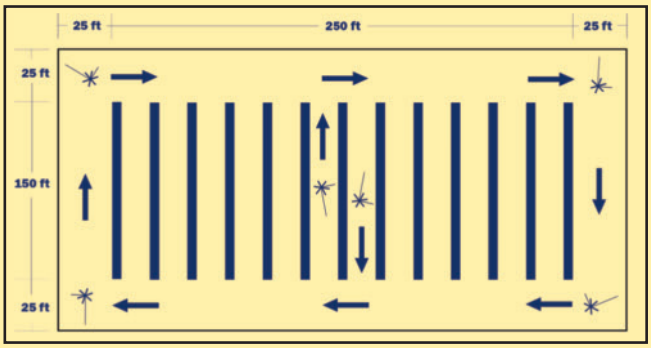
Controller	On / Off; Push Button Operated; Speed Control; Attached to Wall / Post.	



At 45 pounds, these fans are easy to install. The 35 pound fan motor can be pole & chain mounted to a ceiling truss and then the blades can be installed. Separately purchased control cable is then run from the fan to the wall mounted control box.



Example layout to provide whole-building circulation for effective cooling in summer. Reduce fan speed in winter to circulate wasted ceiling heat back down to floor level. These fans provide the most efficient way to reduce utility bills and increase comfort year round. The sideways flow enables the fans to work together for superior circulation compared to downward facing fans.

File Cabinets & Bookcases

tennsco™ Storage Made Easy

Lateral Files

HLPL3672L60

Heavy gauge welded steel construction ensures rigidity and durability for many years of use. Files will accommodate letter or legal hanging files. A mechanical interlock system prevents more than one drawer from opening at a time to eliminate the danger of tipping. Drawers and shelves glide on heavy duty, full extension ball bearing suspensions. A single lock controls all openings. Locks are core removable and master keyed (order keys separately). Each opening is equipped with side-to-side hang rods for the folders. Optional front-to-back rods (H15CR) are available.

Drawers and doors have easy grip, full-width pulls with recessed label holders. Four leveling glides allow the unit to be leveled on uneven floors. To reduce risk of tipping, order two drawer lateral files with counterweights (suffix "W") for all applications except under a work surface in a workstation. Five and six-high units have retractable door(s) with roll-out drawer on top opening(s). Choose an optional laminate top to create a work surface on two and three-high files. Specify Oak or Walnut. Durable powder-coat paint finish available in five colors. FOB Shipping Point.

Adjustable Safety Cage™

- **Versatile, safe alternative to tying off, and more inexpensive alternative to many scaffolding applications.**
- **Co-Molded Snap-On feet.**

Time and energy saving Tip & Glide™ Wheels make it quick and easy to move from job to job. Type IAA ANSI Duty rating 377 lb. weight capacity. FOB Shipping Point.

- **Aluminum stepstool with handrail.**
- **Extra-wide feet help you work over grates or other surfaces when smaller ladder feet could slide.**

The Safety Step is designed for comfort. When accending and descending the ladder, the staircase design helps you feel as if you are walking up and down a set of stairs. The non-slip steps prevent you from losing your balance. The staircase steps are perfect for when you need a temporary staircase like while framing a house or while welding stairs. It is available in 2, 3 and 4-step models. It is a Type IA stepladder, rated for 300 lbs. and meets or exceeds all OSHA and ANSI standards. FOB Shipping Point.

Lenox® Plastic Lockers

- **Patented one-piece box construction.**
- **Corrosion-Proof High Density Polyethylene.**
- **Powder coated stainless steel hinge.**
- **Maintenance-free durability.**

20-Year Warranty

Unlike metal, Lenox Lockers are made of corrosion-proof HDPE material that won't rust or dent. Lenox features a white one-piece box that wraps around with no screws, rivets or mechanical joints. With a box thickness of 3/8" and colored door and frame thickness of 1/2", Lenox Lockers withstand impacts that would easily damage other lockers. The continuous door slide latch is made of 1/2" thick High Density Polyethylene (HDPE) which secures the entire length of the door. Standard lockers include doors with ventilation slots and handles. One and two tier lockers include a double coat hook. A shelf is included with one-tier lockers only. All lockers ship fully assembled saving installation time and money. All locker parts and components carry a 20-year warranty against rust, corrosion, denting, bending and delaminating under normal use. Locker options (sold separately) include End Panels, and Flat Tops which finish exposed white sides of locker. Rough Terrain Stackers

When goods have to be transferred over uneven and rough surfaces, look no further than the electric powered rough terrain stacker. Large front and back rubber tires this unit can easily be used both indoors and out.

Manual Rough Terrain Stackers are capable of going where other stackers can't. The manual design benefits the user by giving precise movement of the unit in particular areas. A simple handle pump lifts and lowers, without the need for mechanical power. Just a simple hydraulic action leads the forks up or down to the desired height. The rubber tires provide stability when traversing rough or uneven surfaces. Baked in yellow powder coat finish.
