• Perfect for storage of supplies, tools, bins, equipment, gear, products, canisters, boxed, etc.

Shelves are box formed at front and back allowing high capacity storage with minimal deflection. Sides of shelves are triple flanged adding to shelf strength. Compression shelf clips improve overall unit capacity. Posts are punched to allow shelves to be adjusted top to bottom at 1-1/2" on center. Beaded front posts allow use of full shelf width and are common between adjoining units reducing assembly and installation time as well as reducing cost. Angle back posts can be bolted together when joining units side-by-side or back-to-back. Side and back sway braces eliminate unit sway providing a safe storage solution. Color: Dark Gray (HG). Drop Bottom Hopper

- **Open top, no lid design**
- **Single bottom door**
- **8" wide fork pockets**

A hopper with a bottom dump feature is a unique design not typical to classic hoppers. With a bottom dump hopper there is limited wasted space. Unlike standard hoppers that have angled sides to encourage the product to flow out, the bottom dump hopper utilizes all of the space in the hopper. There are built-in fork pockets to pick up hopper from the top, allowing the bottom to open and the hopper to be quickly emptied. An attached cable lets the user continue to be seated while opening the bottom hatch, minimizing down time and the need for additional personnel. Blue powder coat finish.

D) Heavy-Duty Dual Wheel Casters

- **"NEW" Easy Turn & Roll.**
- **4", 5", & 6", in all wheel types.**

Dual casters make rolling and turning heavy loads easier than a single wheel. Double the floor contact and when turning a corner, one wheel rotates forward, while the other rotates backward (different action) making this the preferred mode for manual operations with loads from 500 to 4000 lbs. Standard top plate measures 3¾" x 4⅜", bolt hole is 2⅜" x 3⅜", slotted 3" x 3". Larger C top plate measures 4½" x 6¼", bolt holes 2 7/16" x 4 13/16", slotted 3⅜ x 5¼. For C top plate add -C. One of the leading causes of industrial fires is the improper storage and handling of flammable liquids. The Justrite Standard Sure-Grip® EX Flammable Safety Cabinet is designed to safely store flammable liquids. This model is constructed with a sturdy 18-gauge (1-mm) thick steel double-wall with 1.5 in (38 mm) of insulating air space for fire resistance. Cabinets include a cylinder lock and key set, or you can choose to use your own padlock. Trilingual Haz-Alert™ reflective warning labels that read "FLAMMABLE - KEEP FIRE AWAY"are highly visible under fire conditions or during power outages when illuminated with a flashlight.

- **Attractive flush-mounted handle -- ideal in tight spaces and less prone to damage in shipping. Reduces "accidental bangs" from passing traffic.**

Fingertip control with an exclusive slip resistant textured lining on the inside of handle. U-Loc™ handle style accepts optional padlock or can be key locked. Self-latching handle ensures engagement of 3-point latch for protection under fire conditions. Radiused corners on doors for added safety. Plunger Cans

- **Ideal for sponging and cleaning operations.**

Easy to operate – just push down on pan and it automatically pumps liquids into pan to moisten sponge or rag. Surplus liquid drains back. Reduces the danger of exposed liquid. Perforated pan screen also serves as a flame arrester. Unique "smart pump" mechanism works up to a mere ¼" fluid level saving time by refilling less often. More liquid comes to the top for easier moistening. Pump is constructed of brass and Ryton® for chemical resistance. Galvanized steel body is finished in a durable powder paint for long life. Aerosolv® Aerosol Can Disposal System

28225
Aerosolv® Counter makes it easy to count and record the number of aerosol cans punctured.

- **Provides a solution to the expense of solid waste disposal of aerosol cans.**
- **Complies with EPA regulations 40CFR261.23(a)(6).**

The Aerosolv® system safely converts spent aerosol cans from solid hazardous waste to a non-hazardous material. It accepts industry standard sized cans with a maximum height of 8½" (215-mm) and threads directly into a standard 2" (51-mm) bung on a 30 (110-liter) or 55-gallon (200-liter) drum. Body is made of low maintenance aluminum and all moving parts are 308 stainless steel. A non-sparking pin punctures the can and the residual liquids flow into the collection drum. One 55-gallon (200-liter) drum holds approximately 4,200 spent aerosol cans. Attach the two-part combination filter to the ¾" (19-mm) bung to filter VOCs from any residual propellants. The bottom coalescing cartridge transforms residual liquids into droplets that collect in the reservoir of the cartridge and safely drain into the drum. The top activated carbon filter cartridge indicates saturation and serves as a replacement reminder. Economical, non color-changing filter is also available. System includes a combination filter, safety goggles, and an anti-static ground wire with alligator clip. EPA compliant. FOB Shipping Point.

Sign Muscle® preserves the life of your signs and labels! Our NEW & improved Sign Muscle® formulation is powerful enough to survive in most environments…and it's patented. Pioneered more than a decade ago, our scientifically strong liquid laminate protects your identification product from virtually any hazard. Durable, strong and resilient, Sign Muscle® delivers protection - guaranteed. A sign that lasts starts with a quality base material. For example, an industry tested material like plastic versus a typical competitor material with unknown orgins. The wrong base material can speed up damage to the potential life-saving safety message that sits on top. A message that guides a workforce to safety is a message that we can't allow to fade. Longevity through quality also means scientifically engineered ink-sets specifically created for the materials they will be printed on. That's the difference, driven by facts and supported by science. Resist fading and easily restore like new!

Powered Stretch Wrap Machines

- **Increase productivity in the shipping department or at the end of a production line.**
- **Complete with a powered turntable and counter-balanced stretch film mast.**

Easy to operate -- simply depress the foot pedal and manually move the mast up and down. The film-wrap tension is controlled with an adjustable, friction-brake assembly. Film placement is controlled manually by moving the carriage assembly up and down on the vertical mast. An easy-to-release, hand operated carriage-brake allows the carriage to move freely making film application fast and simple. The system will accept 10" to 20" material. The unit ships with mast disconnected-simply raise mast and clamp into place. FOB Shipping Point.

The standard manual film wrap delivery can be upgraded to 115V 1-phase AC powered mast option (PMO). The hand held control is used to raise/lower the film while the foot control is used to operate the turntable. Optional Approach Ramp allows the operator to load and unload the machine with a pallet truck.

HDGPS-55-SCL

Fork Mounted Drum Gripper with Digital Scale

- **T-handles secure unit to forks.**
- **Functional LED digital scale.**
- **Fits 55 gallon drums.**
- **Usable with both steel and poly drums.**

When drums need to be moved, don't do it the old back breaking way. Let the drum grabber do it for you. The drum grabber is the fork mounted way to easily pick up and transfer drums. This unique design lifts the drum from the top lip instead of around the chimes of the drum like so many competitors. To use simply, place the grabber above the drum and lower it, slowly. The grabber will expand to fit around the drum. Safety restraint included. Once in position, raise the grabber so it is secured under the lip of the drum. And just like that, your new era of labor free drum lifting has begun. Capacity 700 lbs. FOB Shipping Point.

Electric Linear Actuated Table Top Scissor Lift Table

- **30 second travel time.**
- **Hand controlled platform movement.**
- **115V-1PH electric operation.**
- **Maintenance-free with grease lubrication.**

With user well-being always at the forefront of everyone's mind, the linear actuated lift table provides an ergonomically friendly option in an otherwise UN-ergonomic world. Due to its small size and lightweight structure the lift table works well when placed directly onto existing work benches or tables. This addition allows the user to work on small, heavy objects, at precise heights. The linear actuator not only plays an integral role to raising and lowering the table top quickly and efficiently. But, it also minimizes any platform drift, which is a common occurrence with standard hydraulic carts and tables. The unique open sided table design lets the user load and unload products without obstruction or hindrance. Capacity 200 lbs. FOB Shipping Point.

LIFTING EQUIPMENT

Counter Balanced Floor Cranes

- **Hand pump or 12V DC powered.**
- **Welded steel construction.**
- **Counterbalance included.**

This crane has an adjustable boom to allow for maximum adjustments and versatility to lift a variety of loads. The boom is raised with a manual hydraulic hand pump or a push of a bottom on DC powered units. The boom also telescopes out for a greater reach. The counterbalance design eliminates the need for front legs, making the unit easier to maneuver and ideal for reaching tight, hard to reach areas. Units roll on two (2) rigid 8" x 2" glass-filled nylon and two (2) swivel 8" x 3" phenolic casters with side brake. FOB Shipping Point.

PERMANENT LIFT MAGNETS

LIFT MAGNET GUIDELINES:

Surface Condition: Magnet face and load surface must be clean and smooth. Capacity ratings listed are on flat, clean and polished steel plate with magnet face in full contact with the load surface. Paint, coatings, scale or other materials between the load surface and the magnet will adversely affect the holding power of the magnet.

Material Thickness: Lifting capacity is lower on thinner materials. Contact dealer for more capacity information.

Material Composition: Magnet capacity is based on lifting low carbon steel. Other materials may reduce lifting capacity.

Load Size and Position: Thin sheets, rough and irregular surfaces, odd shapes and scale all affect holding power adversely and must be considered in establishing a safety factor. The magnet must be positioned on the load center of gravity. Tilted or unbalanced loads significantly affect the holding power of the magnet.

Capacity: Maximum attractive force is approximately twice the rated lifting capacity. Capacity ratings listed are on flat, clean and polished steel plate with magnet face in full contact with the load surface. The above factors should be taken into account when determining appropriated safety factors for a given load. A minimum of 3 to 1 safety factor must be applied based on the actual breakaway force for a given load. **Refer to ASME Standard B30.20 for inspection and operating procedures of Close Proximity Operated Lifting Magnets and read Manufacturers' Operating Manual before using magnet.**

Lifting WEBBING SLINGS

- **Premium edge sling at a standard edge sling cost.**
- **These strong webbing slings ensure worry-free lifting of heavy loads. Polyester standard. Nylon available - call for pricing.**
- **Extremely strong and wear-resistant, yet soft enough to handle even delicate surfaces.**

PRO EDGE Tougher. Stronger. Better.

Pro-Edge® is 50% tougher than standard webbing. The edges are made with high tenacity twisted tire-cord yarns. It is a scientific fact that twisted yarns are more resistant to cutting and abrasion than untwisted yarns. Since these twists are part of the yarn construction, the cut and abrasion resistance properties of the yarn will not go away after standard wear. Pro-Edge® maintains its strength far longer than most other webbings. Polyester standard. Nylon available -- call for pricing. All slings are measured end to end including eyes and/or hardware. Rail Boards

Bluff Rail Boards are a way to bridge the gap between a dock and railcar for safe loading and unloading of shipments. They are custom designed to meet the unique specifications of each dock site, and can work successfully with any type of railcar. Lifting loops and locking rings make the Rail Board easy to place and secure before driving across it with a forklift. Available capacities range from 15,000-90,000 lbs. All-welded steel construction. Worksheet required to design - - call for pricing. FOB Shipping Point.

Edge of Dock Levelers

Bluff's Edge of Dock Leveler provides an easy way to correct the height difference between a dock and trailer bed. With a working range of 5" above and 5" below dock, it accommodates most loading applications. The leveler is positioned by lifting and pulling the handle to the dock floor, and then the latch assembly activates the lip, projecting it forward onto the bed of the trailer as the handle is lifted. When released, the handle automatically returns to its stored position. Conforms to ANSI MH30.1 Standards. FOB Shipping Point.

Edge of Dock Leveler Features

- **Capacities from 20,000 to 30,000 lbs.**
- **Available widths of 66", 72", and 78".**
- **Self-Storing handle.**
- **Bumper and bumper blocks included.**

Loading Dock Arms & Lights

The DL2 Series is a family of loading dock arms and lights reimagined and designed to be the future of dock lighting. The entire offering includes additional arm lengths to accommodate a broader range of applications, optimized arm and light head design, and the introduction of integrated LED technology into dock arms.

The **patented curved arm design** fits around door tracks without the need for additional joints or tubing, and the rectangular design significantly increases the strength and weight capacity compared to traditional dock arms. The DL2 Series arms also include a **bump-stop feature** that prevents the arms from obstructing doors. All dock arms and light heads are equipped with **a safety bumper** to protect operators from injury and mitigate damage to the product. The DL2 Series also utilizes **universal brackets**, making it very easy to install or retrofit existing dock lights without the need to drill new holes or install new mounting studs.

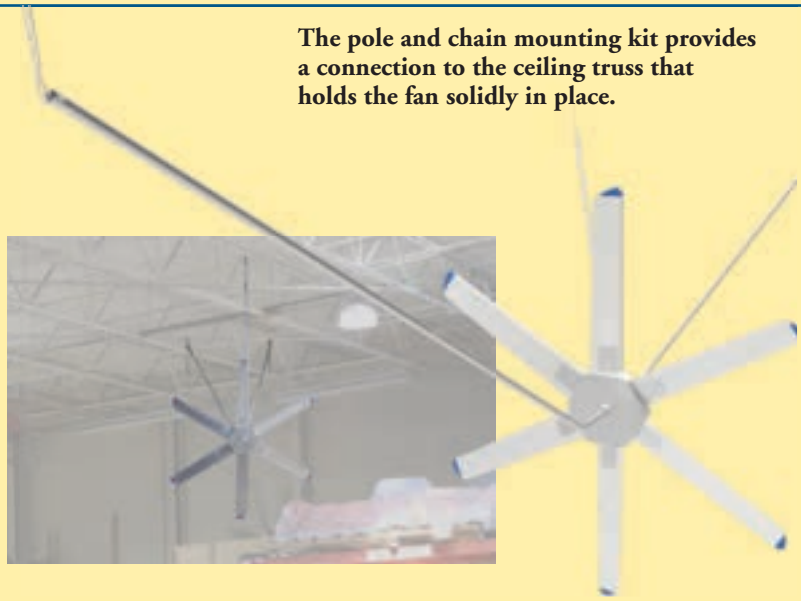
INDUSTRIAL FANS

herkulesFans

Not your typical ceiling fan!

These industrial 7' HVLS fans ceiling mount to blow air sideways and work together to provide superior circulation in larger facilities with ceiling heights of 18 or more feet. These lightweight, easy-to-install fans do a better job of reducing utility bills and providing comfort than larger downward facing fans. FOB Shipping Point.

- Lightweight (45 lbs!) for easy installation
- Custom airfoil design for high airflow
- Low energy usage, reduced utility bills
- Low maintenance direct-drive motor
- Dependable 24/7 operation
- Minimum 9 foot clearance above floor



The pole and chain mounting kit provides a connection to the ceiling truss that holds the fan solidly in place.

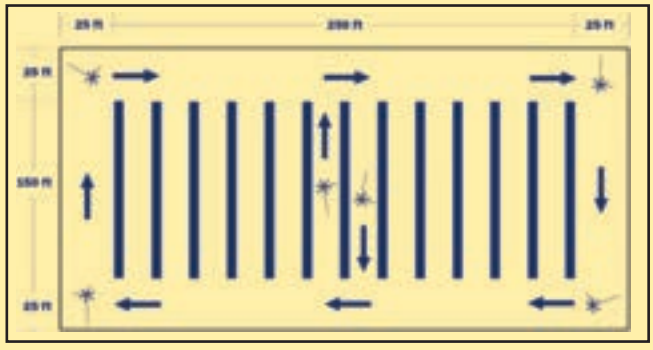
Product No.	INDUSTRIAL CEILING FAN Description	Wt. (lbs.)	Price Ea.
HF0004	84" Unit. VFD speed control and mounting kit	60	$4,995.00

Blade profile to show airfoil shapes similiar to an airplane wing.

The Herkules fan utilizes a custom blade shape to achieve large air flow at very low power usage. Most fan blades on the market are extruded into simple shapes. Herkules' blades are made from aircraft grade aluminum and bent to achieve an optimized design.

Specification and General Information		
Motor 90% Efficiency; Direct Drive; 0.7 hp	**Power Consumption** 10-350 Watts (Variable Speed)	**Input Power; Selectable** 110V, max. 14A; OR 208V - 220V, Single Phase, max. 10A
Fan Weight 45 LBS	**Noise Level** 55 Decibels at 132 RPMs	**Blades** 6 Aircraft Grade Aluminum Aerodynamically Optimized Design
Mount Type Truss Ceiling 3-Point Chain Mount	**Speed Control** 20 - 200 RPMs	**CFM** Up to 30,000
Controller	On / Off; Push Button Operated; Speed Control; Attached to Wall / Post.	

At 45 pounds, these fans are easy to install. The 35 pound fan motor can be pole & chain mounted to a ceiling truss and then the blades can be installed. Separately purchased control cable is then run from the fan to the wall mounted control box.



Example layout to provide whole-building circulation for effective cooling in summer. Reduce fan speed in winter to circulate wasted ceiling heat back down to floor level. These fans provide the most efficient way to reduce utility bills and increase comfort year round. The sideways flow enables the fans to work together for superior circulation compared to downward facing fans.

Universal Edging System The 6" wide safety ramps work on our entire line of ErgoDeck® tiles.

560-563 ErgoDeck® Heavy Duty is designed for work areas with heavy cart and foot traffic. The firmer compound lets carts roll with ease while the underside box-spring design provides structural support and impact absorption. The Open variation facilitates drainage with 15/16" holes. File Cabinets & Bookcases

tennsco Storage Made Easy

Lateral Files

HLPL3672L60

Heavy gauge welded steel construction ensures rigidity and durability for many years of use. Files will accommodate letter or legal hanging files. A mechanical interlock system prevents more than one drawer from opening at a time to eliminate the danger of tipping. Drawers and shelves glide on heavy duty, full extension ball bearing suspensions. A single lock controls all openings. Locks are core removable and master keyed (order keys separately). Each opening is equipped with side-to-side hang rods for the folders. Optional front-to-back rods (H15CR) are available.

Drawers and doors have easy grip, full-width pulls with recessed label holders. Four leveling glides allow the unit to be leveled on uneven floors. To reduce risk of tipping, order two drawer lateral files with counterweights (suffix "W") for all applications except under a work surface in a workstation. Five and six-high units have retractable door(s) with roll-out drawer on top opening(s). Durable powder-coat paint finish available in five colors.
